TRANSFORMING BUSINESS THROUGH TECHNOLOGY

AZURE REVIEW

Technical Assessment & Cost Optimisation

Microsoft Azure

At Core, we understand the challenges businesses face in today's ever-evolving digital landscape.

As a trusted partner in cloud solutions and delivering services based on the Microsoft platform, we are experts in providing a trusted and high value Azure Managed Service.

In the pivotal decision-making process of selecting a partner for your digital evolution, our Azure Technical Assessment and Cost Optimisation (TACO) review stands as a beacon of insight. This comprehensive analysis will show you how to optimise your Azure infrastructure for peak performance, while ensuring fiscal prudence. We'll help show you how you can optimise, secure, and maximise the potential of your Azure infrastructure, while saving on cost.

Is your organisation overspending on cloud infrastructure?[1]

13%
Organisations overspend their cloud budgets by an average of 13%

32%
Almost 32% of total cloud spend is wasted (which has both a financial and environmental impact)

37%
On average, 37% of compute capacity is unused

51%
51% of organisations say the primary reason for cloud wastage is through a lack of visibility into cloud usage and efficiency

What you'll get from the assessment:

- A simple, credible spend reduction plan for your Azure IaaS services
- A clear set of recommendations to correct any deviations from industry best-practice
- A security posture assessment advising you on any security improvements you need to make

What does the assessment involve?

In Core's complimentary Azure TACO review, we'll take you through what recommendations we have that could make a difference in your business immediately, and long-term, focusing in these four areas:

Server Health

Monitoring & Security

Backup & Disaster Recovery

Cost Optimisation & Unused Resources

Beyond the Assessment

The Azure TACO review is a complimentary assessment, and obligation-free.

Should you decide you want to delve deeper into how an Azure Managed Service by Core would transform your organisation, here is a brief overview of what other areas we can cover:

Cost optimisation

Regular optimisation reviews

Automated cost management capabilities

IaaS support

PaaS offerings

Backup and Recovery

Security

Protect your users

Scalable networking

Application hosting
