

# LE&P into Copilot

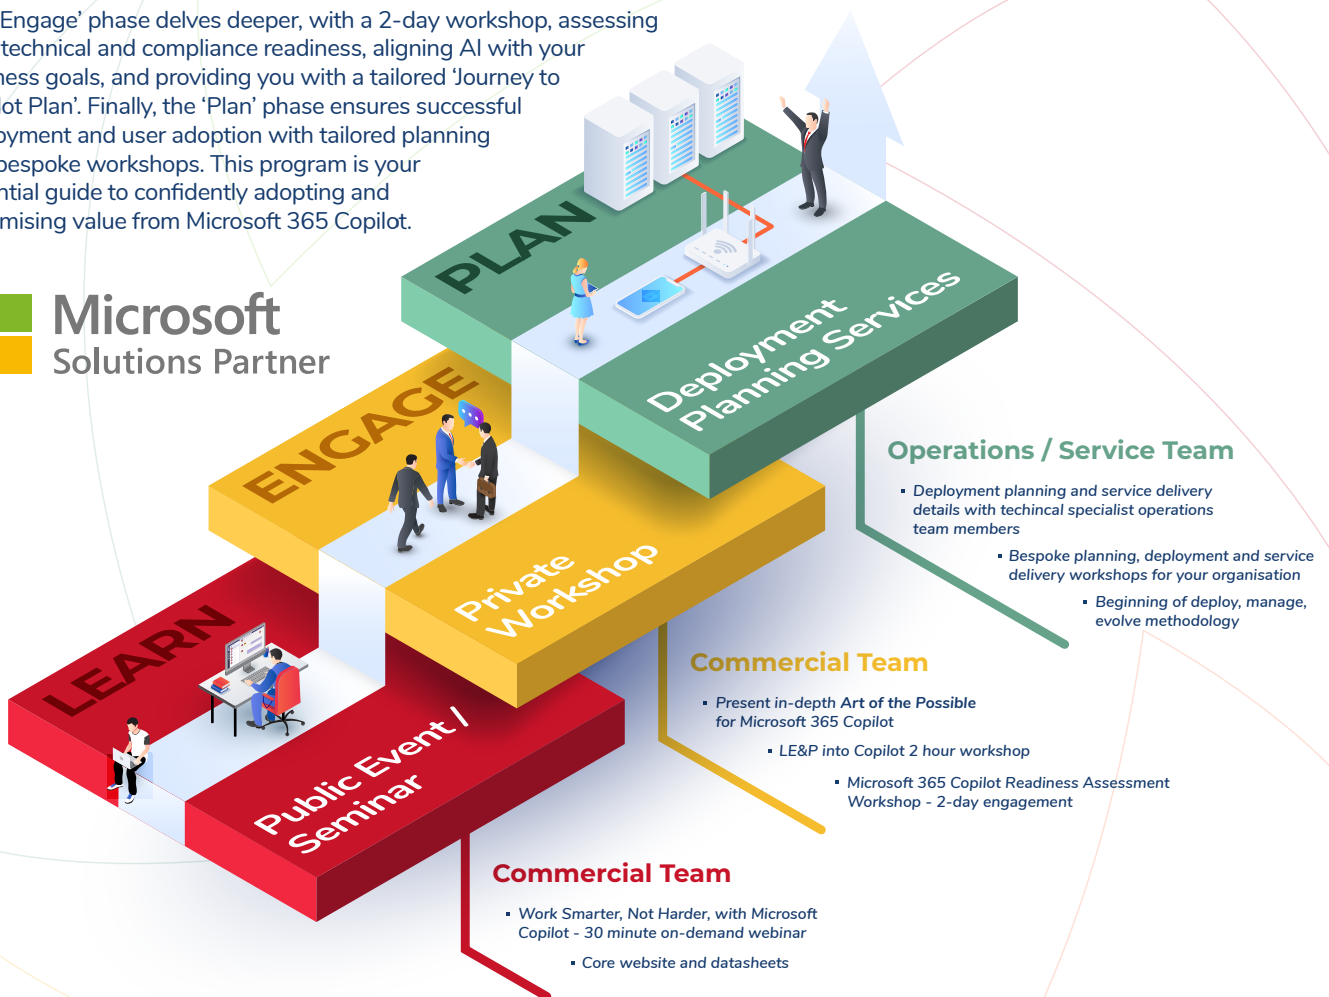

## Core's LE&P into Copilot Program

Core's 'LE&P into Copilot' program offers a comprehensive, structured approach to adopting Microsoft 365 Copilot, ensuring businesses are well-prepared, informed, and supported throughout their journey towards AI-enhanced operations.

Starting with the 'Learn' phase, we offer an insightful **30-minute webinar** with a short demo of what Copilot is. We're now launching a 2-hour LE&P into Copilot workshop, that will be complimentary for a limited time to eligible businesses. In our LE&P into Copilot mini workshop, we'll help you explore the potential of Copilot in your business, with example business use cases, and a high-level understanding of technical and licensing requirements for Copilot.

The 'Engage' phase delves deeper, with a 2-day workshop, assessing your technical and compliance readiness, aligning AI with your business goals, and providing you with a tailored 'Journey to Copilot Plan'. Finally, the 'Plan' phase ensures successful deployment and user adoption with tailored planning and bespoke workshops. This program is your essential guide to confidently adopting and maximising value from Microsoft 365 Copilot.

# Watched the webinar, but still want more information to understand if Copilot is right for your business?

## LE&P into Copilot: Interactive Mini Workshop

We're offering a complimentary 2-hour engagement for a limited time to eligible businesses, focused on exploring the 'Art of the Possible' with Copilot. This session is designed to give you an in-depth understanding of how Microsoft 365 Copilot can transform various aspects of your organisation. By examining its potential impact and outlining key strategies for implementation, we aim to set a solid foundation for your successful journey with Microsoft 365 Copilot.

This workshop delves into the key features and provides a demo and overview of the primary Copilot suite of products, including Copilot (formerly known as Bing Chat Enterprise), Windows Copilot, and Microsoft 365 Copilot. The discussion extends to the seamless integration of Copilot with internal corporate data, illustrating the ways organisations can harness its capabilities. The session then explores practical applications of Copilot within organisations, providing an overview on the benefits and opportunities that early release adopters have gained.

The session concludes by outlining options for full readiness and deployment of Copilot, underscoring its potential as a transformative platform for enhanced collaboration and productivity.

### Workshop Agenda

- Introduction
- What is Copilot?
- Key features, demo and overview of the primary Copilot products
