

Endpoint Management with Security

Powered by Microsoft, delivered by Core

ENGAGE WORKSHOP

Enable users to be productive and secure, on any device, without compromising IT security

Today's users are looking for more ways to remain productive while working on any device. 95% of organisations allow personal devices in the workspace. All these devices add additional risks, when you consider that 70 million smartphones are lost every year.

With users asking for more ways to work the way that they want, this workshop will show you how to manage and secure both company-owned and user-chosen devices in the cloud.

Why you should attend

Experience the power of modern device management and security within your own environment.

This workshop will show you how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration with the Microsoft products you already use. By attending, you can:

Learn

Learn how to improve your management capabilities with Microsoft Intune.

Discover

Discover and protect your endpoints by enforcing policies and deploying security tools.

Secure

Secure your users' identities with multi-factor authentication and conditional access from any device.

Enable

Enable your users to be productive with the applications they need, on the devices they want.

Workshop highlights

- Improve your Microsoft Secure Score with Microsoft Intune
- Learn how to build management policies that protect your users, company data, and devices
- Gain insights about your users' endpoints and their compliance with your IT policies
- Determine the best way to give your users access to the apps they need on the devices of their choosing
- Calculate the ROI your organization can achieve by adopting the Microsoft solutions covered in this workshop

 **Microsoft**
Solutions Partner

We'll customize the workshop based on your organisation's needs

Engagement set up

- Microsoft Intune
- Baseline security
- Device config and management

Design & Planning

Customer value conversation

Discovery session for endpoints

Key results, recommendations and next steps

Whichever modules you select for your workshop, Endpoint Management with Security will deliver simplicity, security, and productivity.

Why Core?

Since 2001 when Core deployed the first installation of SharePoint in the UK, Microsoft products have led businesses to superior levels of productivity, security, and growth. Our focused experience and capabilities allow us to demonstrate excellence in what we do, guiding our customers through growth, reducing costs through efficiencies, and repeatedly driving success with world-class technology platforms.

Wherever you are on your cloud journey, we'd love to help you.

Next steps

Core helps organisations realise the value and transformational impact of the Microsoft 365 suite, so book the Endpoint Management and Security workshop for your business today.
